DEVOPS INTERVIEW STAGES

Technical Online Test

- Time bound, speed matters
 - Don't try to attempt all questions if you feel there are too many questions, try to do a little less but correct
 - Jenkins, Docker, Kubernetes, Terraform, CI/CD, Bash Scripting, git, AWS
- 

AI Round

- Time bound, video interview
 - Scenario based questions
 - Answer all questions, take your time to think a bit and then answer.
 - Jenkins, Docker, Kubernetes, Terraform, CI/CD, Bash Scripting, git, AWS
- 

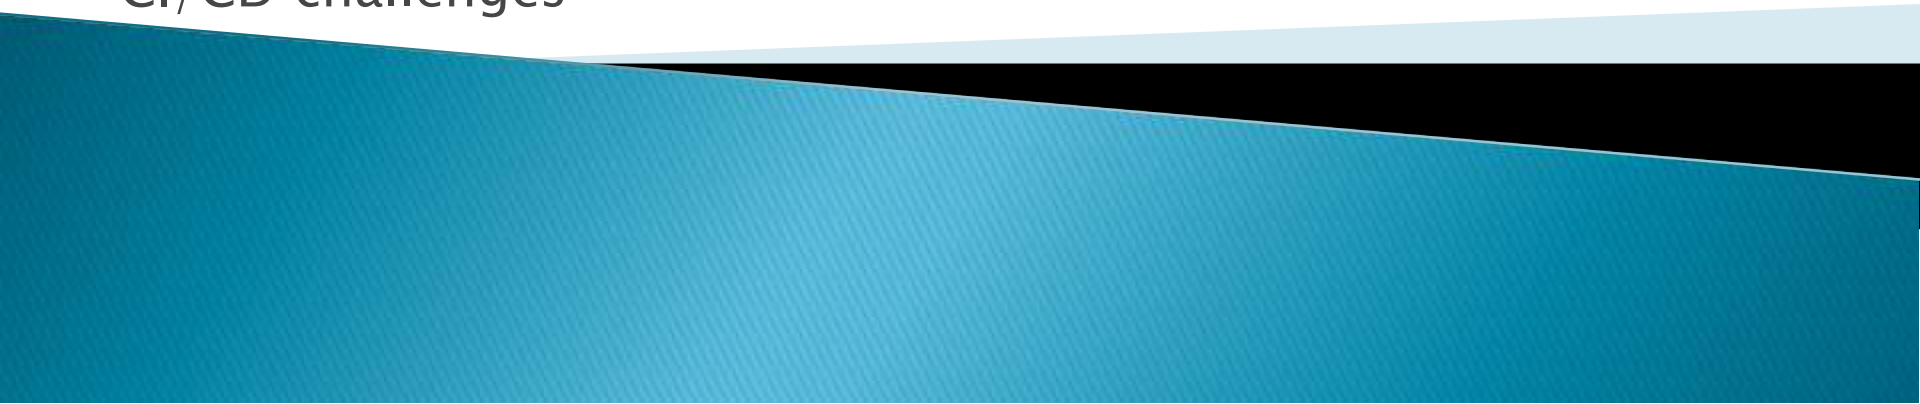

Round 1 (1st Technical)

- Basics or fundamentals of all technologies
- DevOps CI/CD Workflow stages. Explanation of a DevOps Project.
- AWS Basic Services: IAM, EC2 Instance, S3, VPC, ELB, ASGs, HA architecture, ECS and EKS Basics, Route53
- Docker vs VM; Why Docker?; Why Kubernetes? Kubernetes Architecture, services, deployments, statefulsets etc
- Basic Linux Troubleshooting and File Permissions commands
- Terraform basic commands; screen sharing write TF code for AWS ASG
- Ansible basics; screen sharing write playbook to install a package
- Git basic commands, git merge conflicts
- Basic Python or Bash Scripting. Example: backup, check du, service status

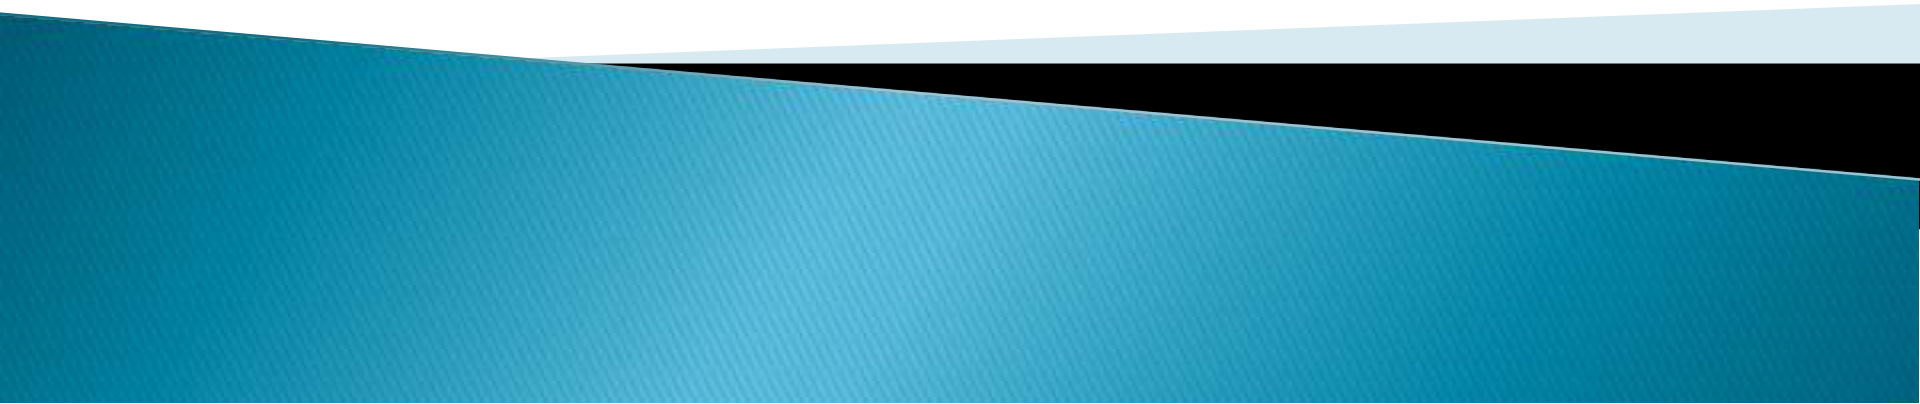

Round 2 (2nd Technical)

- Mostly scenario-based questions
- Kubernetes version upgrade process/challenges; health probes
- How have you deployed EKS clusters? Explain
- Known Kubernetes errors: ImagePullError, CrashLoopBackOff, Pod in pending status, Pod is healthy but application still down etc.
- How to manage secrets in K8s?; dynamic vol provisioning, pv, pvc
- Terraform state file locking and backup
- Monitoring: How to query for failure logs? Create custom dashboards, alert notifications
- ArgoCD: How have you configured applications? How do you authenticate to it
- How are you tagging your container images? Vulnerability Mgmt

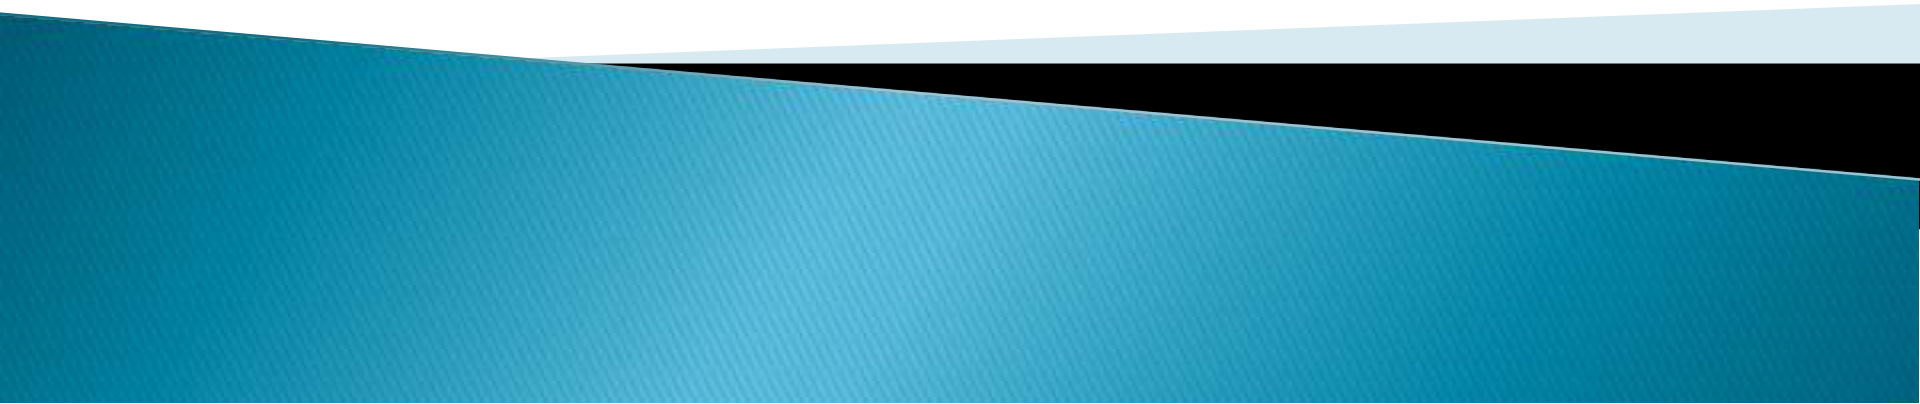

Round 2 (Contd.)

- AWS Cost Optimization projects
 - What automation projects have you completed?
 - How do you upgrade AWS RDS Database instances?
 - AWS EC2 SSH key-pair lost, how to recover?
 - Kubernetes ingress configuration
 - AWS Route53 Disaster recovery
 - Terraform modules, how to use Terraform to create EKS clusters?
 - How do you resolve git merge conflicts?
 - Can you write a Helm Chart from scratch?
 - What are Pod Disruption Budgets (PDBs)?
 - CI/CD challenges
- 

Round 2 (Contd.2)

- AWS Cost Optimization projects
 - What automation projects have you completed?
 - How do you upgrade AWS RDS Database instances?
 - AWS EC2 SSH key-pair lost, how to recover?
 - Kubernetes ingress configuration
 - AWS Route53 Disaster recovery
 - Terraform modules, how to use Terraform to create EKS clusters?
 - How do you resolve git merge conflicts?
 - Can you write a Helm Chart from scratch?
 - What are Pod Disruption Budgets (PDBs)?
- 

Managerial Round

- How do you handle pressure situations?
 - Toughest challenge you have ever faced
 - Where do you see yourself in 5 years?
 - How do you design a security strategy for an application?
 - Biggest weakness and strength
 - Have you ever mentored a junior resource?
 - How DevOps has helped you grow in your career?
 - Have you ever integrated AI with DevOps?
 - Have you handled a team before?
- 

HR Discussion

- Please research about the company culture, current events to understand job security aspect
 - Find out the package range to target a specific CTC on Glassdoor, Ambitionbox etc.
 - Ask current employees on LinkedIn to know the company culture better
 - Ask relevant questions from HR per your research
-
